Re: Letter of Recommendation for Nakul Maini

To Whom It May Concern,

I met Mr. Maini in 2025 when he led the team doing the marketing of my company. Not only was he an absolute delight to speak to, he truly listened to our needs and worked to deeply understand my website, business and goals. I believe we need more people like him working in the workplace because he is “personal” and makes what matters to his clients “personal” and actionable.

Since knowing him, he has even learned another language and is focused on growing an incredible career to help his family. If he were in the United States, I would hire him immediately. I recommend that he be considered for any position he applies to; it is my opinion that if he did not know how, he would learn and excel in anything he sets his mind to do in life.

Please consider this great candidate and man.

Respectfully & Sincerely

Grace Badillo, President
